

Push Service REST APIs

REST APIs

You can use the Push Service REST APIs to work with notifications.

- Use Administration service REST API
(http://www.ibm.com/support/knowledgecenter/SSHS8R_8.0.0/com.ibm.worklight.apiref.doc/apiref/c_restapi_oview.html) for adapters and applications.
- Use Push service REST API
(http://www.ibm.com/support/knowledgecenter/SSHS8R_8.0.0/com.ibm.worklight.apiref.doc/rest_runtime/c_restapi_runtime.html) to access Push functions from a REST API endpoint.

Swagger

In the development environment provided by the DevKit Installer (../installation-configuration/development/mobilefirst) you can also access the Push REST APIs from a Swagger UI. To access it, load the following URL: <http://localhost:9080/doc/?url=/imfpush/v1/swagger.json> (<http://localhost:9080/doc/?url=/imfpush/v1/swagger.json>).
