

# Logging in MobileFirst hybrid applications (JavaScript)

fork and edit tutorial (<https://github.ibm.com/MFPSamples/DevCenter/tree/master/tutorials/en/foundation/6.3/advanced-client-side-development/remote-controlled-client-side-log-collection/logging-hybrid-javascript.html>) | report issue (<https://github.ibm.com/MFPSamples/DevCenter/issues/new>)

## Logging example for hybrid applications (JavaScript)

**Outputs to browser's JavaScript console, LogCat, or Xcode console:**

```
var MathUtils = function(){  
  var logger = WL.Logger.create({pkg: 'MathUtils'});  
  var sum = function(a, b){  
    var sum = a + b;  
    logger.debug('sum called with args ' + a + ' and ' + b + '. Returning ' + sum);  
    return sum;  
  };  
}();
```

## API calls for specific tasks

**Turn log capture on or off:**

```
WL.Logger.config({capture: boolean})
```

**Control capture level (verbosity):**

```
WL.Logger.config({level: string})
```

**Turn automatic log sending on or off:**

```
WL.Logger.config({autoSendLogs: boolean})
```

**Turn automatic configuration retrieval on or off:**

```
WL.Logger.config({autoUpdateConfig: boolean})
```
